WORK EXPERIENCE

■ Oct. 2021 - PRESENT

Nexthink | Remote

LEAD FULL STACK DEVELOPER

- Dedicated to the fast-paced development of reusable, accessible, and modern components, delivering on-time solutions with 99.9% uptime for vital services like live events and campaigns.
- Spearheaded the migration of an outdated WordPress site to JAMStack, resulting in a 75% improvement in page load speeds, higher SEO scores and conversions, and enhanced web accessibility for 20 million annual visitors.
- Redesigned publishing systems and content pipelines, enabling content editors to release updates independently of developers, saving hundreds of developer hours per year.
- Screened, interviewed, hired, and trained three new developers, expanding the team's skillset and capacity.
- Managed a team of four developers through three successful years of software development, fostering a collaborative and innovative growth environment.
- Cultivated consistent communication channels with stakeholders, providing transparent updates on milestones, progress, and goals.

■ May 2018 - Oct. 2021

Eastern Research Group | Boston, MA

FULL STACK DEVELOPER

- Achieved 100% test coverage and WCAG accessibility compliance for a flagship EPA React application.
- Designed and built an internal browser extension for the CDC to automate reporting of fraudulent COVID-19 prevention products on online marketplaces like Amazon and eBay.
- Rebuilt the homepage of a government waste management website, reducing page load times by 80% and boosting traffic from 1,000 monthly users to over 20,000.
- Screened and interviewed junior developers, assisting with onboarding and training

EDUCATION
